

1 This listing of claims will replace all prior versions, and listings, of claims  
2 in the application:

3  
4 **Listing of Claims**

5  
6 **Claim 1** (Currently amended): A user interface comprising:

7 a full scale image presented for display, the full scale image being  
8 generated from a full scale video stream received from a content provider;

9 a scaled image overlaid onto a portion of the full scale image for display,  
10 the scaled image being a scaled representation of the full scale image and  
11 generated from a compressed video stream that is synchronized with the full scale  
12 video stream received from the content provider, the compressed video stream  
13 being a compressed version of the full scale video stream, wherein the compressed  
14 video stream includes scaled images corresponding to full scale images of the full  
15 scale video stream; and

16 a graphical user interface positioned next to the scaled image overlaid onto  
17 the full scale image for display without obscuring the scaled image.

18 **Claim 2** (Original): The user interface of claim 1 wherein the full scale  
19 image is a different format than the image.

20 **Claim 3** (Original): The user interface of claim 1 wherein a user  
21 determines a format of the full scale image and a format of the scaled image.

22 **Claim 4** (Previously presented): The user interface of claim 1 wherein the  
23 full scale image is a full scale video image, and wherein the scaled image is a  
24 scaled video image of the full scale video image.  
25

1       **Claim 5** (Original): The user interface of claim 1 wherein the scaled image  
2 is placed along a left side of the full scale image.

3       **Claim 6** (Original): The user interface of claim 1 wherein a user  
4 determines where the scaled image is overlaid onto the full scale image.

5  
6       **Claim 7** (Original): The user interface of claim 1 wherein the graphical  
7 user interface is configured to receive instructions from a user to provide a  
8 different graphical user interface.

9  
10       **Claim 8** (Currently amended): A method in a client device comprising:  
11 receiving a full scale video stream from a content provider;  
12 receiving a compressed video stream synchronized with the full scale video  
13 stream from the content provider, the compressed video stream being a  
14 compressed version of the full scale video stream;  
15 displaying a full scale image generated from the full scale video stream;  
16 overlaying a scaled image onto a portion of the full scale image for display,  
17 the scaled image being a scaled representation of the full scale image and  
18 generated from the compressed video stream; and  
19 displaying a graphical user interface next to the scaled image overlaid onto  
20 the full scale image without obscuring the scaled image.

21       **Claim 9** (Original): The method of claim 8 wherein the scaled image is a  
22 different format than the full scale image.

23       **Claim 10** (Original): The method of claim 8 wherein the scaled image is  
24 placed along a left side of the full scale image.  
25

1       **Claim 11** (Original): The method of claim 8 further comprising receiving  
2 an instruction from a user to modify information presented by the graphical user  
3 interface.

4       **Claims 12-62** (Canceled)
